

# Lower Heath

## CE Primary School

Part of the **Marches** Academy Trust

### Home Learning

#### **Rationale**

At Lower Heath, we believe learning at home plays an important part in a child's education. It consolidates and extends classroom teaching and supports children to develop self-discipline and independence.

However, we appreciate that with busy lives, it can be a challenge to find sufficient time to complete some formal homework tasks. In addition, it is important for children to spend time with family and friends and pursue hobbies outside of school, to develop their own interests and self-esteem.

As a result, our home learning focusses on consolidation of basic skills: essentially reading, spelling, number bonds up to 100 (i.e. knowing that  $3 + 7 = 10$ , so  $30 + 70 = 100$  etc) and times tables (i.e. knowing that  $9 \times 7 = 63$  etc) up to  $12 \times 12$ .

***We expect a child to spend between 15-30 minutes each day*** (depending on their age) on some or all of these activities. A short, regular burst of focused, quality support with an adult will be hugely valuable to a child's progress.

#### **Rewards to encourage completion of home learning**

All class teachers understand the value in recognising and rewarding children who are developing independence with their learning. Each class will use Class Dojo for this purpose. In addition, weekly and termly certificates are awarded to recognise consistent home learning.

Should the expected home-learning tasks not be completed on a regular basis, the class teacher will contact parents to offer support, should it be needed. If parents are finding it difficult to complete the home learning tasks, children can be given the opportunity to work during their playtimes to catch up with the missed home learning. This will be discussed with parents first.

# Home Learning guidelines and expectations

## Reading

We believe the most important home learning activity is **daily reading**. This does not have to be an onerous task; 'little and often' has a huge, positive impact. Suggested daily reading times are 5-10 minutes in Reception increasing to 15-20 minutes by year 5/6 – see further guidance below.

**There is an expectation that reading at home will happen daily (5 times a week minimum).**

Children will be provided with a reading book from school, which will be at an appropriate stage for their reading level.

## Reading Diaries

Children's home reading and school reading will be recorded in reading diaries. Please write the date of reading, the title of the book read and how many pages or how long your child read for. **Please do not feel you have to make any comment in the diary, unless you wish to.**

Teachers will monitor reading diaries weekly and award stickers to encourage children to engage with their home reading. If a child reads **three times in a week, they are awarded a Bronze Star**, **four times, a Silver Star** and for reading **five times or more each week, a Gold Star** will be awarded. The rewards will be stamped in their reading diaries.

In addition, a weekly certificate will be awarded to the 'Star Reader' from each class. This may be a child who has consistently read at home, one who has demonstrated their love of reading in school or perhaps a child who has shown a real improvement in their home reading.

## Spelling

Children in years 2-6 have been set up on Spelling Shed – please see your child's reading diary for all relevant log-in details. Children in years 2-6 will be provided with a list of 10 words each week to practise at home. These will be provided on paper and also as an 'assignment' on Spelling Shed.

Children in Reception – year 1 will have words or graphemes to learn. These will be sent home on paper and via Class Dojo.

**There is an expectation that letter, grapheme or spelling practice will happen daily (5 times a week minimum).**

Low stakes spelling assessments are carried out weekly from year 1-6. The tests will be marked, and the test books returned home, to provide feedback to parents/carers. **Please ensure the books return to school for the tests each week.**

### **Number Bonds and Times Tables**

To support children with their mathematical development, it is important they have secure mental strategies. Mental maths is taught specifically in school but will only be consolidated with additional work and practice at home.

All children have been set up on Times Tables Rockstars/Numbots – please see your child's reading diary for all relevant log-in details.

**There is an expectation that counting, number bonds or times table practice will happen daily (5 times a week minimum).**

Number Bonds and Times Tables tests are carried out weekly from year 1-6. Teachers will keep a record of attainment in these tests.

### **Key Stage 2 English and Maths workbooks**

As children approach secondary school, it is necessary to prepare them for the homework expectations that will be placed on them in year 7 and beyond. As a result, KS2 children (Kingfisher and Owl Classes) have English and maths workbooks, and they will be asked to complete one activity from each book, each week. This information will be set through Class Dojo.

The answers to the tasks are available online using the links below, allowing you to work with your child to mark them together. These workbooks will not be marked by teachers; they are for home learning only. NB the password is **teachersonly:)** Make sure you include the symbols :)
